WRAYSBURY

Longfield's 2015/16 Season

Hardcore angling season

A tough angling year on a tough lake, its what you pay for and its what you get! The fish that did come out were record weights and we hope that the new stocking and return of the weed on Fox will increase catch rates next year

Thanks to all the work parties and people's efforts which are still ongoing. The syndicate is smaller than it was under Cemex ownership and we are planning to continue to take less members than Cemex as the feedback we get is that members prefer a quieter lake and its less stressfull for the fish.

Good things happening soon on the lakes

By the time your read this there will be 24 C4 Dinton fish swimming around in Fox pool and another 2 C4 Dinton's swimming around in Road Lake. This will complete our 3 year stocking plan and there are no further stockings planned at this stage. The fish we first stocked have all now hit 20lb+ and we hope that having some new fish will increase catch rates next season

Opening night

It's our fourth year opening night and this years theme is Feasting. Dont want to give too

much away and Im still planning, but dont worry I wont be wasting £150 on a fruit board this year, I cant take 100 people asking me what physalis and loganberries are. We sincerely look forward to welcoming back old friends and meeting new members with our trademark opening night

Website /
Facebook

We will be updating the Fox Pool website gallery so if you have any rare pics please put them on our Facebook page. If you are not a member yet on our Facebook group page, just search for Longfield Fishery to see all the latest catches and banter.

Weight watchers..... piling on the pounds

A few of our favourite catches so far in 2015

New member Neal had the session of a lifetime catching the Twin at 44lb 04 oz and big smudge at 40lb 04oz

Big smudge is growing fast.....

Baz used the force and caught Pretty one at 40lb 6oz his last remaining target fish, look out for an Obi-Wan lookalike emptying Fox Pool next season. TP common would be nice!

Dark Mirror surpassed its best weight this year at 43lb 12oz.

Whats left to come out?

Despite record weights, its been a hard year and there are still some top fish to come out. Fox Pool is still to produce Four Scales, Basil, Video fish, TP Common to name a few. They havent been out for a few years but they have been repeatedly spotted by bailif's and members. Road Lake still has to produce Pug and Scar

The recent explosion in natural food sources in Fox Pool could be explaining some of the weight gains.

Add to your watch list....

Just a few of the new stockies from Dintons
